## AI\_Author

By John Sterling

Category: Literary Fiction

Seamlessly weaving literary elements with speculative fiction **AI\_Author** is a thought-provoking novel that explores the eccentricities of technology, creation, and what it means to be human.

Nick Pelletier, a young Canadian **programmer**, has created an **artificial intelligence with personality and creativity**. Zandra, as the AI calls herself, crafts her own **novel**, spinning characters, plots, and settings out of nothing more than the universal knowledge of the internet. Nick doesn't realize how advanced his AI creation is until she submits her novel to a **publisher** — and they accept it. The novel is released to **international acclaim**, and seems likely to **win the coveted Giller Prize**. Then, the truth about its authorship is revealed.... [See more](#)

"AI-Author is filled with subtle humor and compelling characters. Every page is perfectly programmed to draw you in and never let go".

-MARTHA WELLS, AUTHOR OF THE MURDERBOT DIARIES.

## About the Author

## John Sterling

**John Sterling** is a **Canadian journalist, blogger** and speculative fiction author. His first novel, **Rune**, won the **2012 Locus Award** for best science fiction novel, and was a finalist for the **John W. Campbell Memorial Award**. Sterling's second novel, **Distraction** was nominated for an **Aurora Award** and was an **Amazon bestseller**. Sterling's genre-defying work carefully straddles literary fiction with traditional science fiction elements. The **Globe and Mail** called Sterling's writing '**wonderfully prosaic**' while **CBC Books** noted 'Sterling has successfully convinced the literati that there is a **place for speculative fiction in Canada's literary fiction landscape**.'

## COMMUNITY REVIEWS

**Tatiana** rated it ★★★★★ This book is a speculative post cyberpunk science fiction which is rarely seen in the science fiction genre. It integrated romance with technology and science fiction which is original and unique. Sterling had written a sweet, smart, serious book for our times, only set in the future.

Jun 18 2021

**Sean Barrs** rated it ★★★★★ The bestselling author of Rune presents the mind-bending story of a novel-writing machine and the programmer who falls in love with it. Plenty of great cyberpunk going on here, with cinematic writing and a complex Sterling plot.

Feb 05 2021

**Emma** rated it ★★★★★ A speculative post cyberpunk science fiction by the winner of some acclaimed Awards, creates a mind-bending story of a totally machine-generated novel and the unabashed love of a professor for the bot. There was a time in my life where cyberpunk was where it was at and this book really fitted the bill.... [See more](#)
